CVResume evaluation – System Overview

Test Result Analysis & Recommendation - API diagram

CVResume evaluation – Test Case 1

Input

```
{
  "outputLang":"en",
  "resumeJson":{
    "profile":{
      "title":"AI Engineer",
      "yearsExperience":6
    },
    "skills":{
      "skills":[
        "Python","LLMs","GCP"
      ]
    },
    "summary":[
      "AI/ML engineer with experience in
production systems."
    ]
  },
  "targetRole":"role#ai_engineer"
}
```

Field	Is Required?	Description
outputLang	Optional (default = En)	Language of the evaluation output (e.g. En,Th)
TargetRole	Optional	Target role used for role-relevance evaluation (if NA, evaluation is structure-focused only)
resumeJson	Required	Resume content in structured JSON format, separated by sections
resumeJson.profile	Optional	Basic personal and role information (e.g. title, years of experience)
resumeJson.summary	Optional	Professional summary or career overview written by the candidate
resumeJson.education	Optional	Educational background such as degree, institution, and graduation year
resumeJson.experience	Optional	Work experience including roles, responsibilities, and duration
resumeJson.activity	Optional	Activities, projects, certifications, or extracurricular experiences
ResumeJson.skills	Optional	List of technical or professional skills

CVResume evaluation – Resume Evaluation Input Structure

Input payload

The evaluation API accepts a lightweight request wrapper and a structured resume body. The wrapper controls evaluation behavior, while the resume body contains the actual CV content.

Key point:

- Actual resume content
- Flexible : missing sections are allowed
- Used as the main input for scoring

```
{
  "outputLang": "en",
  "targetRole": "role#ai_engineer",
  "resumeJson": {
    "Profile": {},
    "Summary": {},
    "Education": [],
    "Experience": [],
    "Activity": [],
    "Skills": {}
  }
}
```

CV Resume Evaluation Orchestrator

```
"resumeJson":{
  {
    "Profile": {
      "name": "Juan Jose Carin",
      "email": "juanjose.carin@gmail.com",
      "linkedin": "linkedin.com/in/juanjosecarin"
    },
    "Summary": {
      "summary_points": [
        "Experienced data scientist with analytical background."
      ]
    },
    "Education": [
      {
        "institution": "University of California, Berkeley",
        "degree": "MIDS",
        "gpa": "3.93"
      }
    ],
    "Experience": [
      {
        "title": "Data Scientist",
        "company": "CONENTO",
        "dates": "2016",
        "description": [
          "Built ETL pipelines and predictive models."
        ]
      }
    ],
    "Activities": [
      {
        "name": "LLM Evaluation Harness",
      }
    ],
    "Skills": {
      "skills": ["Python","RAG","Data Analysis", "Machine Learning"],
    }
  }
}
```

```

CVResume evaluation – try it !!!

The screenshot shows a web browser window with three tabs, all titled "CV Resume Evaluation Orchestrator". The active tab displays the API documentation for the endpoint `cvresume-eval-orchestrator-du7yhkyqq-as.a.run.app/docs#/default/evaluate_resume_api_v1_resume_evaluations_post`. The page title is "CV Resume Evaluation Orchestrator" with version "1.0.0" and "OAS 3.1" labels. Below the title is a link to `/openapi.json` and a description: "Backend-for-Frontend orchestrator for resume evaluation."

The "default" section lists three endpoints:

- GET** `/health` Health
- GET** `/healthz` Health
- POST** `/api/v1/resume-evaluations` Evaluate Resume

The `POST /api/v1/resume-evaluations` endpoint is expanded, showing the following details:

- Parameters:** No parameters.
- Request body:** *required*. The media type is set to `application/json`.
- Example Value:** A JSON object representing a resume evaluation request.

```
{
  "outputlang": "en",
  "resumelison": {
    "profile": {
      "title": "AI Engineer",
      "yearsExperience": 6
    },

      "skills": [
        "Python",
        "LLMs",
        "GCP"
      ]
    },
    "summary": [
      "AI/ML engineer with experience in production systems."
    ]
  }
}
```

CVResume evaluation – Test Case 1 (Output – EN)

output payload

This slide shows the final result of the evaluation.

We calculate section scores, normalize them, apply weights, and produce a global grade with an overall feedback summary.

- Final global grade after normalization and weighting
- Aggregated raw and maximum scores across all sections
- Per-section weighted score contribution
- High-level global feedback summarizing resume quality

```
{
  "status": "success",
  "data": {
    "conclusion": {
      },
    "sectionDetail": {
      },

CVResume evaluation – Test Case 1 (Output – EN)

output payload

Each section is evaluated using multiple criteria, and we return both numeric scores and qualitative feedback.

- Detailed scores per resume section
- Criteria-based evaluation (e.g. Length, Grammar, Content Quality)
- Score + feedback for each criterion
- Section-level summary feedback explaining strengths and weaknesses

```
{
  "status": "success",

CVResume evaluation – Resume Evaluation Input Structure

Input payload

The evaluation API supports Thai-language output without requiring any schema changes. The same resume structure and scoring logic are used, while all feedback is generated in Thai, making the system suitable for localized users.

Key point:

- Same structured resume format
- Language of resume content can be English or Thai
- Used as the primary source for scoring and feedback generation

```
{  
  "outputLang": "th",  
  "targetRole": "role#ai_engineer",  
  "resumeJson": {  
    "Profile": {},  
    "Summary": {},  
    "Education": [],  
    "Experience": [],  
    "Activity": [],  
    "Skills": {}  
  }  
}
```

CV Resume Evaluation Orchestrator

```

CVResume evaluation – Test Case 1 (Output – EN)

output payload

This slide shows the final result of the evaluation.

We calculate section scores, normalize them, apply weights, and produce a global grade with an overall feedback summary.

- Final global grade after normalization and weighting
- Aggregated raw and maximum scores across all sections
- Per-section weighted score contribution
- High-level global feedback summarizing resume quality

CVResume evaluation – Test Case 1 (Output – EN)

output payload

Each section is evaluated using multiple criteria, and we return both numeric scores and qualitative feedback.

- Detailed scores per resume section
- Criteria-based evaluation (e.g. Length, Grammar, Content Quality)
- Score + feedback for each criterion
- Section-level summary feedback explaining strengths and weaknesses

```

- Each criterion is scored independently per section. A value of 0 indicates the criterion is not applied to that section.
- Section weight determines how much each resume section contributes to the final score. The sum of all section weights equals 1.0
- Sections with no data or disabled criteria do not affect the final score.

Section	Completeness	Content Quality	Grammar	Length	Role Relevance	Section Weight
Profile	10	10	0	0	0	0.10
